

# Tulsa Regional STEM Alliance Spring Events

**Jan. 27**

K-12 Students from all over the Tulsa area are invited to build remote-controlled underwater robots.

**Feb. 2**

An all-day girls' event designed to inspire the next generation of female STEM professionals.

**March 30**

K-12 students build boats using only cardboard & duct tape, which they will then race across the length of a pool.

**April**

A day for high school seniors who are committing to study engineering in college to come together to sign letters of intent.

**May 4**

In 2018, the state-kite festival is expanding into a regional festival.
